ZwiftPLAN Training: Daily Cheat SheetStructured training using Zwift Routes

	WEEKI	
09-May-22	Monday	Volcano Circuit CCW (Watopia) [12.3km 7.6mi] 3 laps
Ave Watts	215.8	Course Profile: Rolling 51m 167.3ft
Train for (mins)	21.0	This Threshold session is designed to improve all-round ability just below FTP
Session	Threshold	Warmup before startline, then ride at 216 watts in Zone 4 (ie an ave of 93% of FTP) for 21 mins
Zone	Zone 4	On a road bike, at this pace, complete each lap of this circuit in a time of 7 mins from the start line

10-May-22	Tuesday	Beach Island Loop (Watopia) [25.6km 15.9mi] 2 laps
Ave Watts	153.1	Course Profile: Rolling 88m 288.7ft
Train for (mins)	49.0	This Recovery session is designed to aid recuperation and fatigue
Session	Recovery	Warmup before startline, then ride at 153 watts in Zone 2 (ie an ave of 66% of FTP) for 49 mins
Zone	Zone 2	If you pace correctly we estimate you should complete one lap of this circuit in a time of 24.5 mins

11-May-22	Wednesday	Volcano Climb (Watopia) [22.8km 14.2mi]
Ave Watts	237.5	Course Profile: Hilly 192m 629.9ft
Train for (mins)	38.0	This Interval session is designed to improve VO2max & anaerobic sprint ability as *hard intervals*
Session	Interval	Warmup before startline, then ride at 301.6 watts (130% of FTP) for 3mins hard & 2mins easy (162w in z1) repeated 8 times
Zone	Zone 6 / Zone 1	On a road bike, at this pace, complete this course in a time of 38 mins from the start line

12-May-22	Thursday	Mountain Route (Watopia) [29.5km 18.3mi]
Ave Watts	167.0	Course Profile: Climb 671m 2201.4ft
Train for (mins)	65.0	This Endurance session is designed to improve aerobic power and long distance ability
Session	Endurance	Warmup before startline, then ride at 167 watts in Zone 2 (ie an ave of 72% of FTP) for 65 mins
Zone	Zone 2	If you pace correctly we estimate you should complete this route in a time of 65 mins
12 M 00	Estatus.	D 0#

14-May-22	Saturday	Big Loop (Watopia) [42.4km 26.3mi]
Ave Watts	167.0	Course Profile: Climb 651m 2135.8ft
Train for (mins)	86.0	This Endurance session is designed to improve aerobic power and long distance ability
Session	Endurance	Warmup before startline, then ride at 167 watts in Zone 2 (ie an ave of 72% of FTP) for 86 mins
Zone	Zone 2	If you pace correctly we estimate you should complete this route in a time of 86 mins

15-May-22	Sunday	Three Sisters (Watopia) [47.8km 29.7mi]
Ave Watts	167.0	Course Profile: Climb 879m 2883.9ft
Train for (mins)	103.5	This Endurance session is designed to improve aerobic power and long distance ability
Session	Endurance	Warmup before startline, then ride at 167 watts in Zone 2 (ie an ave of 72% of FTP) for 103.5 mins
Zone	Zone 2	If you pace correctly we estimate you should complete this route in a time of 103.5 mins

	WEEK2	
16-May-22	Monday	Volcano Circuit CCW (Watopia) [12.3km 7.6mi] 3 laps
Ave Watts	233.7	Course Profile: Rolling 51m 167.3ft
Train for (mins)	20.5	This Interval session is designed to improve VO2max & anaerobic sprint ability as *hard intervals*
Session	Interval	Warmup before startline, then ride at 302 watts (130% of FTP) for 2.5mins hard & 2mins easy (162w in z1) repeated 5 times
Zone	Zone 6 / Zone 1	On a road bike, at this pace, complete each lap of this circuit in a time of 6.8 mins from the start line

17-May-22	Tuesday	Hilly Route (Watopia) [27.3km 17mi] 3 laps
Ave Watts	153.1	Course Profile: Hilly 300m 984.3ff
Train for (mins)	55.5	This Recovery session is designed to aid recuperation and fatigue
Session	Recovery	Warmup before startline, then ride at 153 watts in Zone 2 (ie an ave of 66% of FTP) for 55.5 mins
Zone	Zone 2	If you pace correctly we estimate you should complete one lap of this circuit in a time of 18.5 mins

18-May-22	Wednesday	Volcano Circuit (Watopia) [12km 7.5mi] 3 laps
Ave Watts	245.9	Course Profile: Rolling 51m 167.3ft
Train for (mins)	19.0	This HIT session is designed to improve supra-threshold intensity, around 6% above FTP
Session	HIT	Warmup before startline, then ride at 245.9 watts in Zone 5 (ie an ave of 106% of FTP) for 19 mins
Zone	Zone 5	On a road bike, at this pace, complete each lap of this circuit in a time of 6.3 mins from the start line

19-May-22	Thursday	Volcano Flat (Watopia) [36.9km 22.9mi] 3 laps
Ave Watts	167.0	Course Profile: Rolling 138m 452.8ft
Train for (mins)	68.5	This Endurance session is designed to improve aerobic power and long distance ability
Session	Endurance	Warmup before startline, then ride at 167 watts in Zone 2 (ie an ave of 72% of FTP) for 68.5 mins
Zone	Zone 2	If you pace correctly we estimate you should complete one lap of this circuit in a time of 22.8 mins

ZwiftPLAN: Weekly Periodization View

12week overview of the entire plan (with summary hours and TSS)

Personalized training

This plan is specific to your needs and your training schedule

Training plan included

We calculate the best daily, weekly, monthly plan for you

Matched optimal zwift routes

We find the best Zwift route to match your workout, everyday

Zwift workouts not needed

Our training is based on free rides, or group rides, not workout mode

Your Personalized Plan

INPUTS

INTRODUCTION

Although training using Zwift is fun, progress will be improved if you apply a structured training plan to your rides, but what exactly should you do?

We will take care of the hard work for you! There is no need to try and find zwift workouts or training specific zwift races

We match an optimal training style (aka TID = training intensity distribution) against your goals

We combine that with your chosen hours per week and days per week taking into account build vs rest periods

We also work out the intensity of each ride leading to a 'time-in-zone' calculation. Combine these elements and voilà, you have a workout plan

But that's not all, we match that plan against every available Zwift course and give you a target time and suitable watts for your chosen workout.

Remember this is personalized, you can decide on the hours, days, courses and even the training style (but we will make a recommendation).

Questions? zwiftplan@gmail.com

WORKOUT SESSIONS

These are the sessions that may appear in your zwiftPLAN (they do not require workout mode, just ride at the prescribed watts)

An Endurance ride is designed to improve aerobic power and long distance ability

A Sweetspot ride is designed to improve all-round ability at tempo (12% below threshold)

A Threshold ride is designed to improve all-round ability just below FTP

A HIT ride is a hard effort designed to improve supra-threshold intensity, around 6 % above FTP

This is a VO2max Interval session to improve anaerobic sprint ability as on & off efforts

A Mixed ride is is designed to improve all-round ability across all zones to enhance repeatability

A Recovery ride is designed to aid recuperation and fatigue by riding medium distance at low intensity

Oh yes, there is also a Day-Off, when no doubt we will find you in the gym right?

YOUR TRAINING ZONES

Our recommended rides conform to the following classic training zones based around your FTP

YOUR FTP 232.0

	Zone 1	Zone 2	Zone 3	Zone 4	Zone 5	Zone 6	Zone 3
PERCENTAGE	≤55%	≤ 75 %	≤ 90 %	≤105%	<120%	≤150%	88%-93%
LOWER LIMIT	0.0 watts	129.9 watts	176.3 watts	211.1 watts	245.9 watts	280.7 watts	204.2 watts
UPPER LIMIT	129.9 watts	176.3 watts	211.1 watts	245.9 watts	280.7 watts	350.3 watts	218.1 watts
_	Recovery	Endurance	Tempo	Threshold	VO2max	Anaerobic	SweetSpot

ZwiftPLAN: TRAINING SCIENCE

Training science is a complicated business, just look at all the arguments online! Here we are going to take a pragmatic approach, sticking with the fundamentals.

Essential equation for training adatation:

stimulus + rest = gains

But here is the problem

Strong stimulus = risk of burnout

Weak stimulus = slow progress

Too much rest = detraining

Too little rest = fatigue

So we need to find the optimal training stimulus and the optimal rest. This optimal prescription is personal to you but there are some lessons from science.

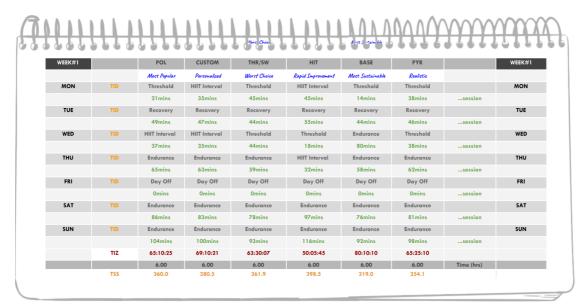

Starting slowly, and building gradually is generally better than over-reaching

Adding 10% training load per month or less is a good ballpark for a build phase, but consolidation and rest phases are also needed

Polarized, HIT and Pyramidal plans currently have more scientific evidence compared to (mostly) threshold or (mostly) sweetspot

ZwiftPLAN: TRAINING INTENSITY DISTRIBUTION

Based on the science above, here is an overview of the optimal training style based on your inputs, from weeks 1 and 2

Why ZwiftPLAN?

We hope you will agree that we have built a clever tool that will help you with your training.

Sure, you can just do free rides or races everyday but is that honestly the best long term approach?

The answer is structured training (https://pubmed.ncbi.nlm.nih.gov/28350537/)

The problem with structured training is that it is a real headache to plan.

What duration? what intensity? what degree of progression? How many rest days?, which route? Luckily ZwiftPLAN will take care of all of that.

ZwiftPLAN will actually work out the optimal training using scientific principles (TID, time-in-zone, work/rest ratio and periodization)

We will send you our recommended training style but you can overrule this, if you wish (eg swap pyramidal training for HIT)

Also you can tell us the courses you like (eg I don't want to ride Richmond), and you can tell us your riding preference (eg I ride MTB! or I ride TT)

So, ZwiftPLAN works out out the optimal training calendar and training style then deep-dive into your sessions on a daily basis to find the best route.

ZwiftPLAN:FAQ

Here is a short FAQ about things you might want to ask

1. What do I need to get started?

Just a bike, zwift and a ZwiftPLAN

2. Do I have to train every day, precisely as is prescribed?

No, what we show you the 'ideal plan' with a full calendar but it is ok to skip a day or two if tired, or recovering. In fact we recommend this, look after yourself!

3. Should I follow the exact watts that are recommended?

Assuming your FTP is entered correctly, the recommended watts should place you in the right training zone.

But if you want to come out of that zone because you feel stronger (or weaker) on any session, try adjusting the watts by 5% initially

4. Can I ride further than the prescribed session?

Sure why not, just remember there is another session coming up! Also if you are finding the sessions too easy, maybe it is time for an FTP test again!

5. Can I enter a Zwift race or fondo instead of the listed session?

Yes, for sure, have fun, a zwift race is a good substitute for a HIT session or a threshold session, and a fondo is a good substitute for an endurance section

6. How do you find the optimal route each day?

This is clever calculation that picks the closest finish time on 100+ routes personalized to you, and then filtered by the Zwift courses you told us that you prefer. For example let's say your are riding tempo@200w for 12mins, we estimate you will complete 2x laps of watopia volcano circuit in that time

7. Something has changed, how do I update my zwiftPLAN?

Simple, resubmit a new request and we will run the algorithm again! If you are a subscriber, update your data (via the submission form) and we will update it next month.

8. How many hours per week and days per week should I train?

Hmm, pick sufficient hours to build your fitness, but don't train so many hours that you burn out!

If you are not sure, ask how many hours do you wish you trained last week, now take off days you were too busy are use that number. In short, be ambitious, but realistic, around your lifestyle.

9. How should I warm up and cool down?

Warm up for 2-4mins by riding easy during the log-on screen or before the start line.

Cool down by riding 2-4mins by riding after you hit your workout goal (hopefully after the finish line)

10. Can I ride use ZwiftPLAN with outdoor training rides?

Sure, simply substitute a zwift course for a real route, and ride roughly to that zone and that duration (not distance)

Personalized training

This plan is specific to your needs and your training schedule

Training plan included

We calculate the best daily, weekly, monthly plan for you

Matched optimal zwift routes

We find the best Zwift route to match your workout, everyday
